

New Networks - New Solutions 26-28 May 2016 Darwin Australia
integrating the 11th Australasian Lymphology Association Conference
and the 6th International Lymphoedema Framework Conference

The ALA and the ILF warmly invite you to the very first Asia Pacific Lymphology Conference, to be held in 2016 in Darwin, Northern Territory, Australia. Although Darwin is now a modern cosmopolitan city, it retains the feel of a frontier town with a strong touch of the Asia/Pacific. Darwin has long been called Australia's Asian Gateway - which is why it has been chosen for the first joint ALA and ILF conference.

The theme "New Networks – New Solutions" reflects the coming together of the two organisations, the northern and southern hemispheres, and the East and the West. Join us in this new territory as we share stimulating ideas, new research and innovative solutions to the many issues faced by health practitioners who treat people with lymphatic dysfunction.
